

## PAPER TITLE

MARIJA MARKOVIĆ<sup>1</sup>, JOVAN JOVANOVIĆ<sup>2</sup>

<sup>1</sup> University of Belgrade – Faculty of Economics and Business, symopis2022@matf.bg.ac.rs

<sup>2</sup> University of Belgrade – Faculty of Economics and Business, dekanat@matf.bg.ac.rs

---

**Abstract:** *This document presents a template for preparing the papers that will be included in the Conference Proceedings. We strongly recommend that your papers be prepared in the form of this template.*

**Keywords:** *Operational Research, Sym-Op-Is 2022, Vrnjačka Banja, University of Belgrade – Faculty of Economics and Business*

## 1. INTRODUCTION

The article should not exceed 6 pages (A4 format) including tables, diagrams and bibliography. The margins of the pages should be 2 cm (top, bottom, left, right).

All necessary parameters (paper size, styles used for formatting) are defined in style file “symopisen.cls”. If you use this template file, you have just to apply common  $\LaTeX$  environments in order to obtain proper formatting<sup>1</sup>. The citations should be done with the `\cite` command and should look like this [1] or like this [2, 3] if you cite multiple references.

Luckily, you will not have to follow the instructions bellow. You can use this template as a sample.

### 1.1. The first page

The first page should includes:

- The title of the article typed in **BOLD CAPITAL LETTERS**, left aligned, Times New Roman, size 12 pt.
- The name and surname of the author(s) typed in CAPITAL LETTERS, left aligned, Times New Roman, size 10 pt.
- The author(s) institutional affiliation(s) typed in lower case letters, Times New Roman, size 10 pt.
- Skip a line.
- **Abstract:** At the left margin, **bold, italic lower case letters**, typed in Times New Roman, size 11 pt. This is followed by a text of up to 150 words, typed in single line spacing, Times New Roman, size 11 pt.
- 4-5 keywords. Skip a line.
- This is followed by the main text typed in single line spacing, with Times New Roman, size 11 pt, justified, all paragraphs with a 0.5 cm indent in the first line, except for the first paragraph after a heading.

## 2. SUBTITLES

A decimal system numbering of up to three levels is used for the headings of the sections:

- **FIRST LEVEL:** At the left margin, with **BOLD CAPITAL LETTERS**, Times New Roman, size 13 pt.
- **SECOND AND THIRD LEVELS:** At the left margin, with **bold lower case letters**, Times New Roman, size 11 pt.

## 3. TABLES AND CHARTS

**Tables** and **Figures** are placed in the text after the relevant remark. They are numbered in accordance with their appearance in the text. All figures and tables must have titles and must be referenced in the text.

---

<sup>1</sup> See file “symopisen-template.pdf”

**Table 1:** Caption of table

Year	Revenue
2004	20.000
2005	25.000
2006	33.000

**Figure 1** Caption of figure

#### 4. MATH FORMULAE

Present simple formulae in the line of normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g.  $x/y$ . In principle, variables are to be presented in italics. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text). Put the numbers in parentheses at the right margin of the text, e.g.

$$P(X = x) = e^{-\lambda} \frac{\lambda^x}{x!} \quad (1)$$

#### 5. CONCLUSION

Clearly indicate advantages, limitations and possible applications.

#### Acknowledgement

A brief acknowledgement section may be included here.
